Tree	 **Corymbia citriodora 'Lemon Essence'** 'LEMON ESSENCE' DWARF LEMON SCENTED GUM
Description	This tree is a dwarf version of the much larger Australian Lemon-Scented Gum. It has the same beautiful attributes of its parent (lemon-scented foliage, smooth trunk, pinkish-white bark) but grows smaller and more compact. Unlike the more upright growing Corymbia citriodora 'Scentuous', this tree has a larger, rounded canopy.
Foliage	☒ Evergreen
Form	☒ Round
Mature Size	6m x 8m
Uses	As a smaller, more compact tree, 'Lemon Essence' lends itself more readily to residential and commercial urban applications, streetscapes and parks. It is highly bird and insect-attracting.
Position & Soil	While it tolerates a wide range of soil types, a well-drained soil in a full sun position is ideal. It can tolerate frost and drought.
