Tree	 Corymbia eximia nana DWARF YELLOW BLOODWOOD TREE
Description	A smaller version of Corymbia eximia (syn. Eucalyptus), the foliage is broad with a strong green colour and may turn a paler yellow/green in the colder months. The trunk adopts a gnarly, crooked appearance with mottled brown bark and in Spring the tree puts on an eye-catching display covering itself in creamy yellow flowers, attracting nectar loving birds.
Foliage	☒ Evergreen
Form	☒ Round
Mature Size	6-8 x 4-6m
Uses	This tree makes a good feature tree particularly in a lawn or as a part of a wind break or native shelter. It is used extensively in streetscapes due to its restricted size.
Position & Soil	Suits dry conditions once established. Will tolerate most soils in full sun position. Does not tolerate frost well. Leaves will turn a yellow green in winter but as the weather heats up the colour will change quickly.
