Tree

Corymbia eximia

YELLOW BLOODWOOD TREE

Description

This Australian native Corymbia (syn. Eucalyptus) has scaly yellow-brown bark. The leaves are broad, thick, curved and blue-green in colour. It produces large creamy flowers in spring that are in clusters of up to seven. The flowers attract birds and insects in spring.

Foliage

☒ Evergreen

Form

☒ Round

Mature Size

10 x 7m

Uses

A great feature medium-sized tree for large gardens. Can also be used in streetscapes and parks. Great for habitat for native fauna.

Position & Soil

Suits dry conditions once established. Will tolerate most soils in full sun position. Does not tolerate frost well. Leaves will turn a yellow green in winter but as the weather heats up the colour will change quickly.
