Tree

Magnolia grandiflora 'Kay Parris'

KAY PARRIS MAGNOLIA TREE, SOUTHERN
MAGNOLIA TREE (EVERGREEN)

Description

A beautiful dense tree with small mid-green glossy leaves and brown velvety underside. It produces creamy white fragrant flowers anytime during the warmer months from November through March. The tree grows denser and flowers are bigger than 'Little Gem', making this a popular alternative. It differentiates itself from other varieties by its wavy edge to its leaf and its bright pink new growth.

Foliage

☒ Evergreen

Form

☒ Round

Mature Size

6 x 3m

Uses

Great stand-alone specimen tree. This variety is also appropriate for using as an evergreen screen or hedge due to its consistently dense growth habit.

Position & Soil

It grows and flowers best in full sun positions. In part shade, flowering is considered steady. Tolerates polluted city atmospheres. Prune to shape in spring. Benefits from the application of a balanced long-term fertiliser. Magnolias require organic, well-drained soil with summer irrigation for success.

Features	☐ Small ☐ Evergreen ☐ Round ☐ Avenue ☐ Coastal ☐ Driveway ☐ Feature Flower ☐ Feature Foliage ☐ Formal Screening ☐ Group Planting ☐ Hedging ☐ Informal Screening ☐ Signature Trees ☐ Specimen
Pot sizes in production	• 40cm/27L (1.2-1.5m) • 50cm/52L (1.6-2.0m) • 100L (2.0-2.4m)
Substitutes	• Arbutus unedo • Hakea salicifolia • Prunus lusitanica • Tristaniopsis laurina 'DOW10' Luscious ®
