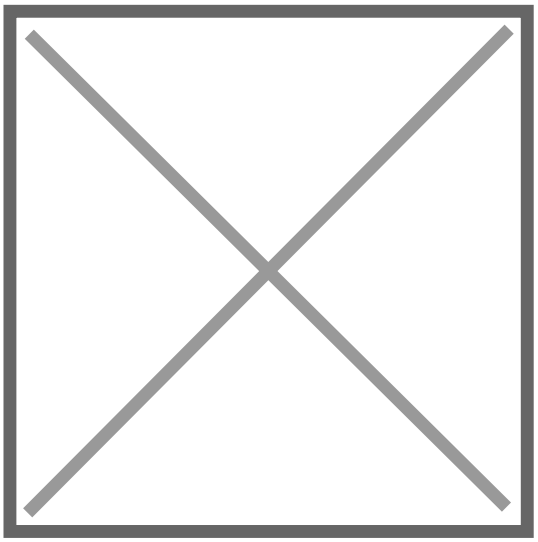
Corymbia citriodora 'Lemon Essence'



'LEMON ESSENCE' DWARF LEMON SCENTED GUM

This tree is a dwarf version of the much larger Australian Lemon-Scented Gum. It has the same beautiful attributes of its parent (lemon-scented foliage, smooth trunk, pinkish-white bark) but grows smaller and more compact. Unlike the more upright growing Corymbia citriodora 'Scentuous', this tree has a larger, rounded canopy.

As a smaller, more compact tree, 'Lemon Essence' lends itself more readily to residential and commercial urban applications, streetscapes and parks. It is highly bird and insect-attracting.

While it tolerates a wide range of soil types, a well-drained soil in a full sun position is ideal. It can tolerate frost and drought.

Foliage	Evergreen
Form	Round
Mature Size	6m x 8m
Family	Myrtaceae

Small	Evergreen	Round	Avenue	Bird Attracting	Feature Bark	Feature Foliage	Group Planting

Informal Screening	Native	Specimen
